About this guide

This guide describes the LTKL content management system (CMS) as built. Menu names, field labels and help texts are quoted exactly as they appear on screen, so you can match them in the admin panel. Screenshots are taken from the live CMS at cms.kabupatenlestari.org (September 2026); the data you see may differ.

1 Introduction

The CMS is the back office of the Kabupaten Lestari website. Everything visitors see on the public site — pages, navigation, news, kabupaten profiles, job vacancies — is entered here.

What you can manage

Area	What it controls on the website
Pages & Menus	Every page of the site, built from reusable content blocks, plus where each page appears in the Main, Header and Footer menus.
Posts	News articles, videos, events, library documents and media coverage.
Join Form Submissions	Messages sent through the “Bergabung / Join Us” form (read-only inbox).
Collections	Categories and Tags used to classify posts.
Kabupaten	Member district profiles: map pin, landscape figures, commodities, impacts and stories.
Pillars	The LTKL pillars with their statistics, results and field practices.
Participation Pathways	The ways people can get involved (also used as “Role” on the join form).
Job Opportunities	Open and closed vacancies.
Secretariat	Secretariat team members for the organisation chart.
Website	Site name, logos, footer, social media, global SEO, cookie notice, Mailchimp and join-form email.
Users	Who can sign in to the CMS.

Key ideas to know before you start

1. Everything is bilingual

Most forms have two tabs: **Indonesian** and **English**. Each tab holds its own title, slug and content. Fill in both so the page works in both languages on the website. Images, dates and settings outside the tabs are shared by both languages.

2. Slugs are created for you

The **Slug** is the part of the web address that identifies a record (e.g. `/berita/festival-lestari-2026`). When you type a title and leave the field, the slug is generated automatically. You can edit it, but it must be unique.

3. Published vs. draft

Almost every record has a **Set as published** switch. When it is off, the record is saved but hidden from the public website — useful for drafts.

4. Deleting is reversible

Deleted records go to the trash first. You can bring them back with **Restore**. Only **Force delete** removes a record permanently.

5. Order is drag-and-drop

Lists where order matters (Pages, Collections, Kabupaten, Pillars, etc.) can be re-ordered by dragging rows. Repeating items inside forms (statistics, commodities, list items) can also be dragged.

2 Getting Started

Signing in

- 1 Open the admin address in your browser: `https://<website-domain>/administrator`.
- 2 Enter your **Email address** and **Password**.
- 3 Tick **Remember me** if you are on your own computer, then click **Sign in**.

Keep credentials private

Never share your password by chat or email. If you think it has been exposed, change it right away from your profile (Chapter 9) or ask an administrator to reset it.

The admin layout

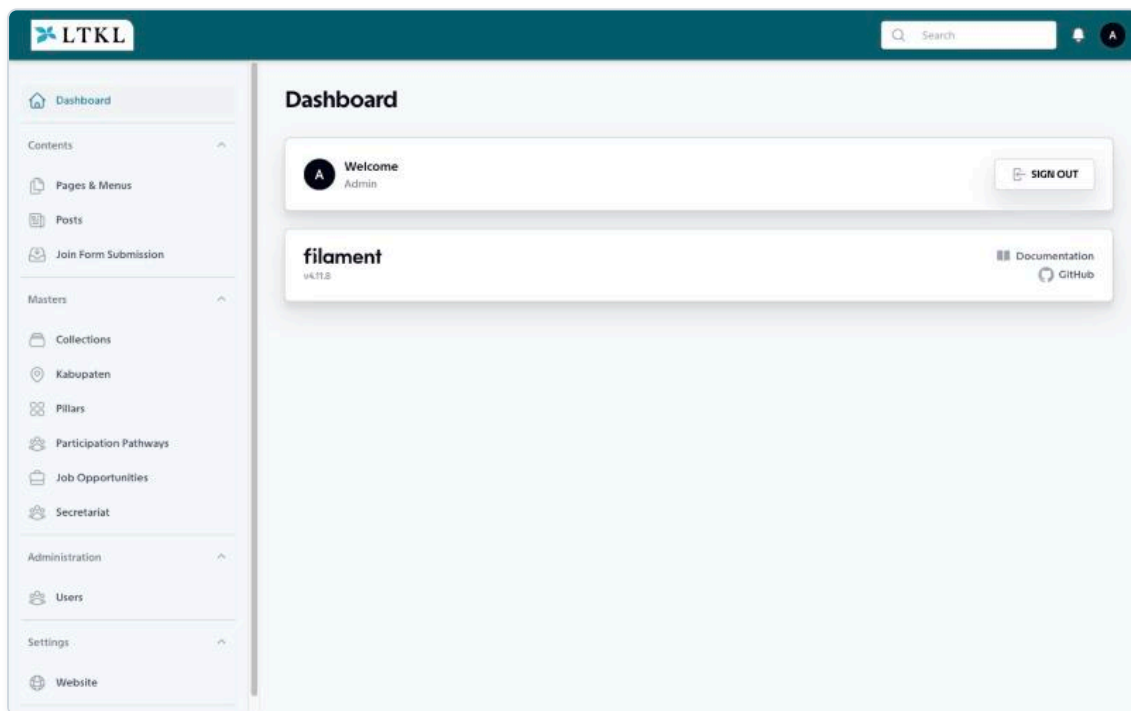

Figure 2.1 — The Dashboard after signing in. Left: sidebar navigation grouped into Contents, Masters, Administration and Settings. Top-right: search, notifications and your account menu.

Sidebar navigation

Group	Menu items
(top)	Dashboard — welcome screen with your account and a Sign out button.
Contents	Pages & Menus · Posts · Join Form Submission
Masters	Collections · Kabupaten · Pillars · Participation Pathways · Job Opportunities · Secretariat
Administration	Users

Your account menu (top-right avatar) gives access to **Profile** and **Sign out**. The bell icon shows system notifications, and the search box at the top searches across records.

Tip

The panel loads pages without a full refresh, so moving between menus is fast. If something looks out of date after another person edits it, reload the browser tab.

3 Working with Records

All sections of the CMS work the same way: a list screen to find records, and a form to create or edit one. Learn this once and you can use every menu.

The list screen

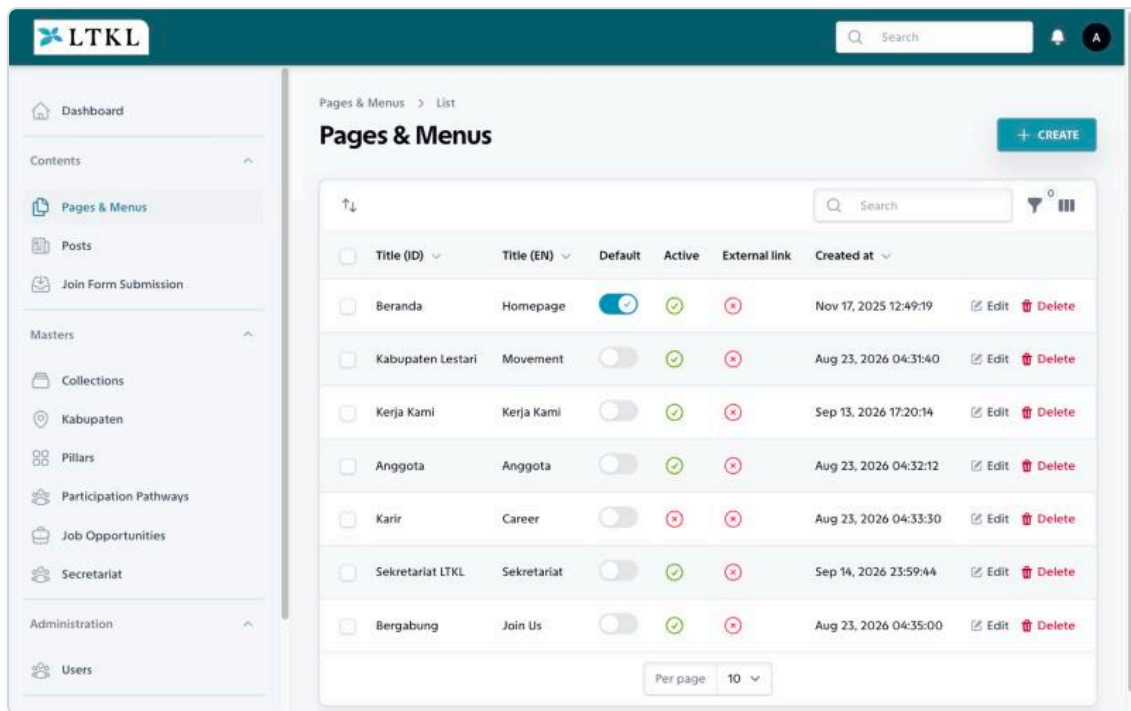

Figure 3.0 — A list screen (Pages & Menus): re-order button, search, filters and column picker above the table; Edit and Delete on each row; Create at the top-right.

- **Search** — type in the search box above the table to filter by title.
- **Sort** — click a column header to sort.
- **Filter** — the funnel icon opens filters. Most lists have a **Trashed records** filter (show without / with / only deleted records). Kabupaten also has a **Published** filter; Join Form Submissions a **Role** filter.
- **Tabs** — the Posts list has tabs per post type (All, Article, Video, Event, Library, Media Coverage) with a count badge.
- **Row actions** — **Edit**, **Delete**, and for deleted rows **Restore** / **Force delete**. Posts also have **Copy** to duplicate a post.
- **Bulk actions** — tick the checkboxes on the left of several rows to delete, restore or force-delete them together.
- **Re-order** — on sortable lists, click the re-order icon (↑↓) at the top-left of the table, then drag rows by their handle. Click it again to finish.

The form screen

Figure 3.1 — A typical form (Create Post). Left: language tabs with translated content. Right: shared settings such as type, image, relations and publish status. The recommended image size is shown under the upload box.

- Fields marked with * are required. If one is missing, the form scrolls to it and shows a red message.
- Always check **both** language tabs before saving — a required field in the hidden tab will also block saving.
- Click **Create / Save changes** to store your work, or **Cancel** to leave without saving. On Page forms the save button is also at the top of the screen.

Rich text editor

Longer texts (Lead, Description, Banner Title, etc.) use a rich text editor with a deliberately small toolbar so the website stays consistent:

Buttons	Use for
Bold, Italic	Emphasis inside sentences.
H3, H4	Sub-headings inside long text.
Quote, Bullet list, Numbered list, Link	Quotations, lists and hyperlinks (select text, click Link, paste the URL).
Table	Simple data tables.

Tip

When pasting from Word or Google Docs, paste as plain text (`Ctrl/Cmd + Shift + V`) and re-apply formatting with the toolbar. This avoids hidden styles breaking the layout.

Uploading images and files

- Drag a file onto the upload box or click it to browse. The recommended size and dimensions are shown under each image field — follow them for sharp, fast-loading pages.
- Typical limits: post images 5 MB at 1200×630 px; kabupaten and pillar images 2 MB at 800×460 px; banners 5 MB at 1366×768 px; logos (SVG, PNG or WEBP) 1 MB at 400×120 px. Documents (library files, job descriptions, external files): maximum 50 MB.
- File names are kept as uploaded, so give files clear names before uploading (e.g. `Laporan-tahunan-2025.pdf`).
- To replace an image, remove the current one with the button under the preview, then upload the new one.

Repeaters and blocks

Some fields hold a list of items — for example statistics, commodities or the content blocks of a page. For each list you can:

- **Add** an item with the button under the list.
- **Collapse / expand** items with the arrow on the item header to keep long forms tidy.
- **Re-order** by dragging the handle, or with the up/down arrows.
- **Clone** an item (where available) to reuse its structure, or **delete** it with the trash icon.

4 Pages & Menus

Contents → **Pages & Menus**. A page is built by stacking content blocks (“components”). The same record also decides whether and where the page appears in the site navigation.

Page list

Columns: Title (ID), Title (EN), Default, Active, External link and timestamps. The order of this list is the order used in menus — use the re-order button to drag pages into position.

Creating or editing a page

Click **Create** for a new page, or **Edit** on a row.

Figure 4.1 — Editing a page: language tabs and components on the left; status, Menu Settings and SEO Settings on the right. Save changes and Cancel appear at the top and bottom.

Language tabs (Indonesian / English)

Field	Description
Title *	Page title. Also used as the menu label.
Slug *	Web address of the page in that language. Filled automatically from the title; must be unique.
Meta title	Title shown in Google results and browser tabs. Leave empty to use the page title.
Meta description	Short summary for search engines (about 160 characters).

Components	The page content, built from blocks (see block reference below). Hidden when the page is an external link.
-------------------	--

Status panel

Field	Description
Set as default page	Marks the home page — the page shown at the root of the site. Only one page should be default.
Set as published	Turn off to hide the page from the website.

Menu Settings

Field	Description
Set as active	Shows the page in the navigation. Turn off to keep the page online but out of the menu.
Set as external link	Turns the menu item into a link to another address instead of a content page. Components are hidden.
Menu url	The target address for an external link (e.g. <code>https://dashboard.kabupatenlestari.org</code>).
Menu parent	Choose a parent page to make this page a sub-menu item. Leave empty for a top-level item.
Menu group	Main, Header and/or Footer . “The page shows up in every group picked here.”

SEO Settings

Meta image — the image shown when the page is shared on social media (Facebook, WhatsApp, LinkedIn, X). If empty, the global meta image from Website settings is used.

Main menu
Beranda
Tentang Kami
↳ Visi & Misi (Menu parent = Tentang Kami)
↳ #Journey (block “Add as submenu”)
Kabupaten
Dashboard ↗ (external link)

How the menu is assembled
1. Pages with *Set as active* on
2. Grouped by *Menu group*
3. Nested by *Menu parent*
4. Ordered by the page list order
5. Blocks with *Add as submenu* become anchor links under their page

Figure 4.2 — How Menu Settings translate into website navigation.

Page components (block builder)

In the **Components** field, click **Add to components** and choose a block. Blocks appear on the page in the order listed; drag them to re-order. Blocks start collapsed — click a block header to open it, or use **Expand all** / **Collapse all**. The trash icon removes a block; the ↑↓ handle moves it.

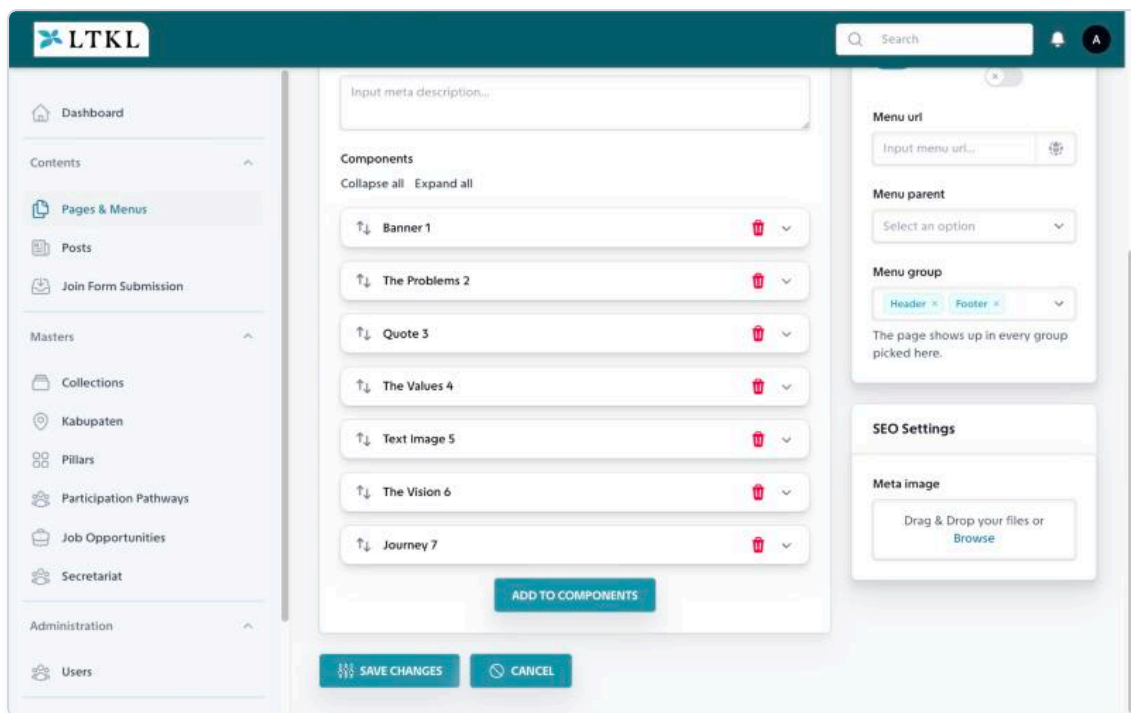

Figure 4.3 — The components of a page, each shown with its block name and position. “Add to components” opens the block picker.

Add as submenu

Most blocks start with an **Add as submenu** switch: “Show this section as an anchor link under the page in the menu.” When on, an optional **Submenu title** appears; if empty, the block title is used. Use this for long pages so visitors can jump to a section.

Block reference

Block	Fields	Use it for
Banner	Banner Image, Banner Label, Banner Title*, Banner Description, Button #1 Text/URL, Button 2 Text/URL	Large hero at the top of a page.
Banner Statistic	Label, Items (Title, Value, Unit), Button #1 & #2 Text/URL	Hero-style row of key figures.
Collection	Label, Title, Collection*, Display (Participation Pathways only), Description	Shows a live dataset managed under Masters — see list below.
Bergabung Form	Label, Title, Description, Contact info; <i>Job Opportunity Section</i> and <i>Newsletter Section</i> (Label, Title, Description, Button Label, Button Link)	The “Join us” page with its form, contact details and pointers to jobs and the newsletter.
Latest News	Label, Title, Button Text	Teaser of the most recent posts.
Post Index	(no fields)	Full, filterable list of posts (news page).
Lead Text	Lead	Large introductory paragraph.

Paragraph	Title, Content	Standard text section.
Quote	Quote*, author details	Highlighted quotation.
Text Image	Show as colour block, Background Color, Image, Image Position (Top / Left / Bottom / Right), Lead, Label, Title, Subtitle (Kabupaten), Description, Button Text/URL	Text beside an image, optionally on a brand-colour background.
Single Image	Image, Caption	A full-width picture.
Statistic	Items (Title, Value, Unit), Button Text/URL	A row of numbers.
Statistic With Title	Label, Title, Description, Items, Button Text/URL	Numbers with an introduction.
Embed iFrame	Label, Title, iFrame URL	Embedding maps, dashboards or forms from another site.
The Values	Label, Title, Description, Items (Title, Description)	Values list.
The Problems / The Vision	As above + Image per item	Illustrated item lists.
Kompas Kabupaten Lestari	As The Vision + Label per item	The Kompas framework items.
Proof of Concept	As The Vision + Related Post per item	Examples that link to a post ("Optional. The frontend links this item's button to the post.").
Info List	Label, Title, Description, Layout (Accordion / Card), Items	FAQs, facts & figures and similar lists.
Journey	Label, Title, Description, Steps (Title, Period, Description, Is past)	A timeline. Step numbers follow the row order; turn on <i>Is past</i> for steps that already happened.

Collection block — data sources

Collection	Shows
Kabupaten Map	Interactive map with the pins set on each Kabupaten.
Kabupaten List	Cards of all published Kabupaten.
Pillars	All published Pillars.
Participation Pathways	Ways to participate. Choose Display : Side Accordion (default), Card or Full Accordion.
Job Opportunities	The vacancies list.
Secretariat	The secretariat organisation chart.

5 Posts

Contents → **Posts**. All dated content — news, videos, events, publications and press coverage — is a post. The **Type** decides which extra fields appear.

Post types

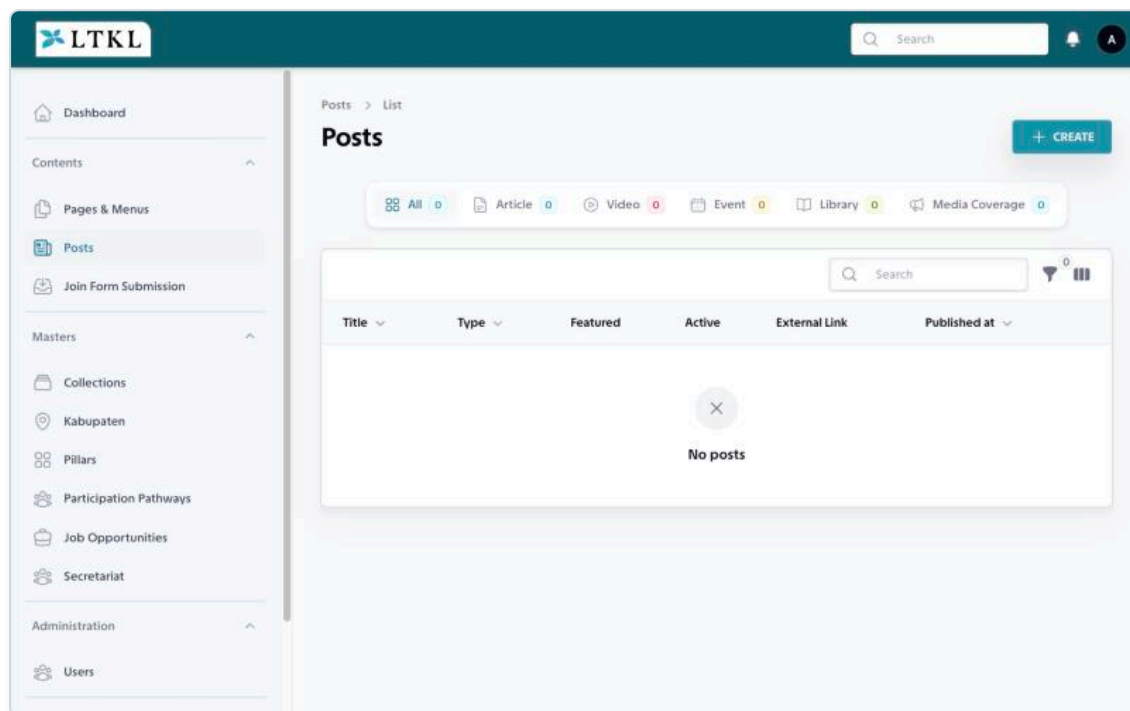

Figure 5.1 — The Posts list with a tab per post type; each tab shows how many posts it holds.

Type	Use for	Extra fields that appear
Article	News and stories.	Article Details (“Byline shown under the article title”): Author, Read time (minutes) — leave empty to calculate it from the content.
Video	YouTube / Vimeo videos.	Video Details: Video URL*, Duration (mm:ss), Subtitles (ID / EN).
Event	Upcoming or past events.	Event Details: Start date*, End date, Start/End time, Timezone (WIB/WITA/WIT), Registration URL, Open to public, Registration open; per language: Location, Cost.
Library	Reports, papers, downloadable documents.	Library Details: Page count, License, Cover; per language: Document file, Access note.
Media Coverage	Articles about LTKL published by other media.	Media Coverage Details: Publisher name*, Journalist, Published at source, Source URL*, Publisher logo.

Fields

Language tabs

Field	Description
Title *	Headline of the post.
Slug *	Auto-generated from the title; must be unique.
Lead	Short intro shown on cards and at the top of the post.
Contents	The body, built from content blocks (see below). Hidden for external posts.

Side panel

Field	Description
Type *	Article (default), Video, Event, Library or Media Coverage.
Image	Main/thumbnail image — ideally max 5 MB and 1200×630 pixels.
Tags	One or more tags (managed in Collections).
Categories	One or more categories (managed in Collections).
Kabupaten	Link the post to one or more kabupaten; it then appears on those kabupaten pages.
Published at *	Publication date and time shown on the post and used for ordering.
Set as published	On by default. Turn off to keep as a draft.
Set as featured	Highlights the post in featured areas of the website.
Set as external	The post card links elsewhere instead of opening a post page (see below).

Event badges and buttons

- **Registration URL** — target of the “Daftar sekarang” button. Leave empty to hide it.
- **Open to public** — shows the “Terbuka untuk umum” badge.
- **Registration open** — shows the “Pendaftaran dibuka” badge.
- Leave **End date** empty for a single-day event.

External posts

Turn on **Set as external** when the post should point somewhere else. Then choose the **External Type**:

- **Link** — enter the **External url** (`https://...`).
- **File** — upload the **External file** (max 50 MB); the card opens the file.

The Contents builder is hidden for external posts, because no post page is shown.

Post content blocks

Block	Fields
Excerpt	Title, Content
Paragraph	Title, Content
Lead Text	Lead
Quote	Author, Quote
Single Image	Title (caption), Image

Each post block has its own on/off switch on the block header — switch it off to hide a block temporarily without deleting it.

Copy a post

In the list, use the **Copy** row action to duplicate a post (for example, a recurring event). Change the title and slug of the copy before publishing.

6 Join Form Submissions

Contents → **Join Form Submission**. A read-only inbox of everything visitors send through the “Bergabung / Join Us” form on the website.

- The list shows Name, Email, Organization, Phone, Role and Submitted date. Filter by **Role** to see, for example, only people interested in a particular participation pathway.
- Click **View** to open a submission. It shows **Contact Information** (Full name, Email, Organization, Phone), **Participation** (Role, Interest) and **Metadata** (Submitted At, Last Updated).
- Submissions cannot be edited in the CMS. Each new submission is also emailed to the **Recipient email** set in Website → Join Us.

Where does “Role” come from?

The Role options on the public form are the published **Participation Pathways** (Chapter 7). Adding a pathway adds a new choice to the form.

Personal data

Submissions contain personal data. Only export or forward them for the purpose the visitor agreed to, and do not share them outside the team.

7 Masters

Master data is reference content reused across the site — in page Collection blocks, post relations and forms.

7.1 Collections (Categories & Tags)

Masters → **Collections**. Categories and tags used to classify posts. Created and edited in a pop-up window. The list has **Categories** and **Tags** tabs.

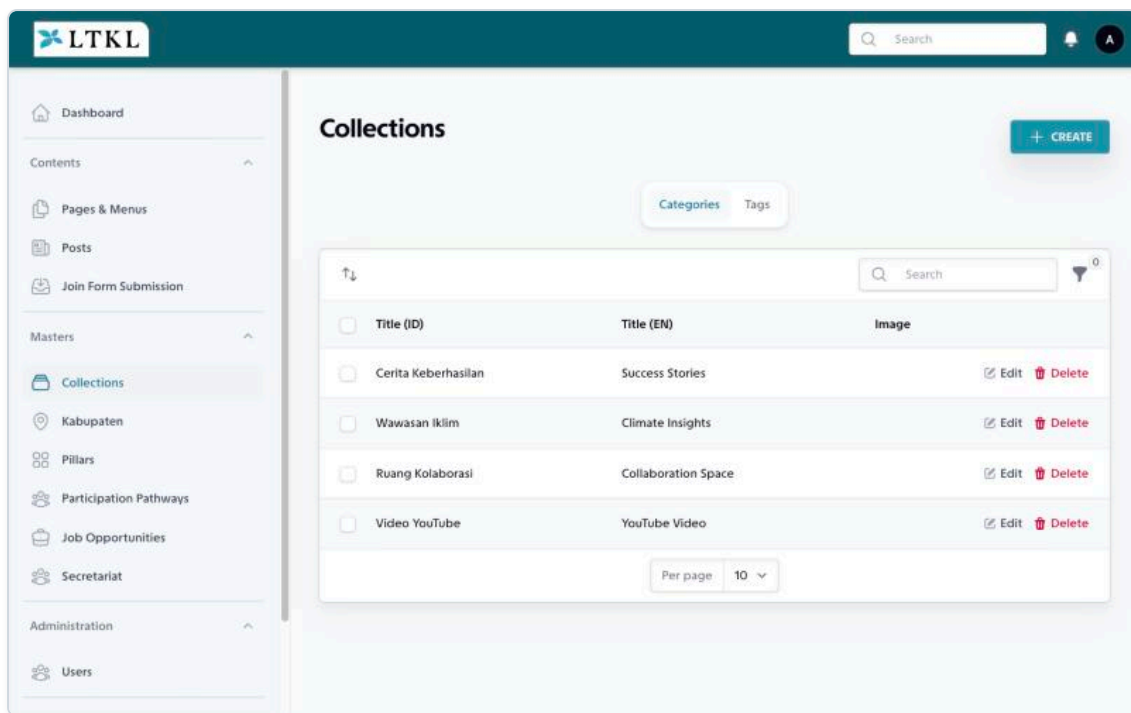

Figure 7.1 — Collections, with tabs for Categories and Tags.

Field	Description
Type	Categories or Tags.
Image	Optional illustration.
Title (Indonesian / English)	Name in each language; slugs are generated from them.
Slug (Indonesian / English)	Must be unique.
Short description / Content	Optional descriptions in both languages.

Drag rows to change the order in which categories and tags are listed.

7.2 Kabupaten

Masters → **Kabupaten**. A profile for each member district. The list shows Image, Title (EN/ID), Slug, number of related Pillars and Posts, and Published.

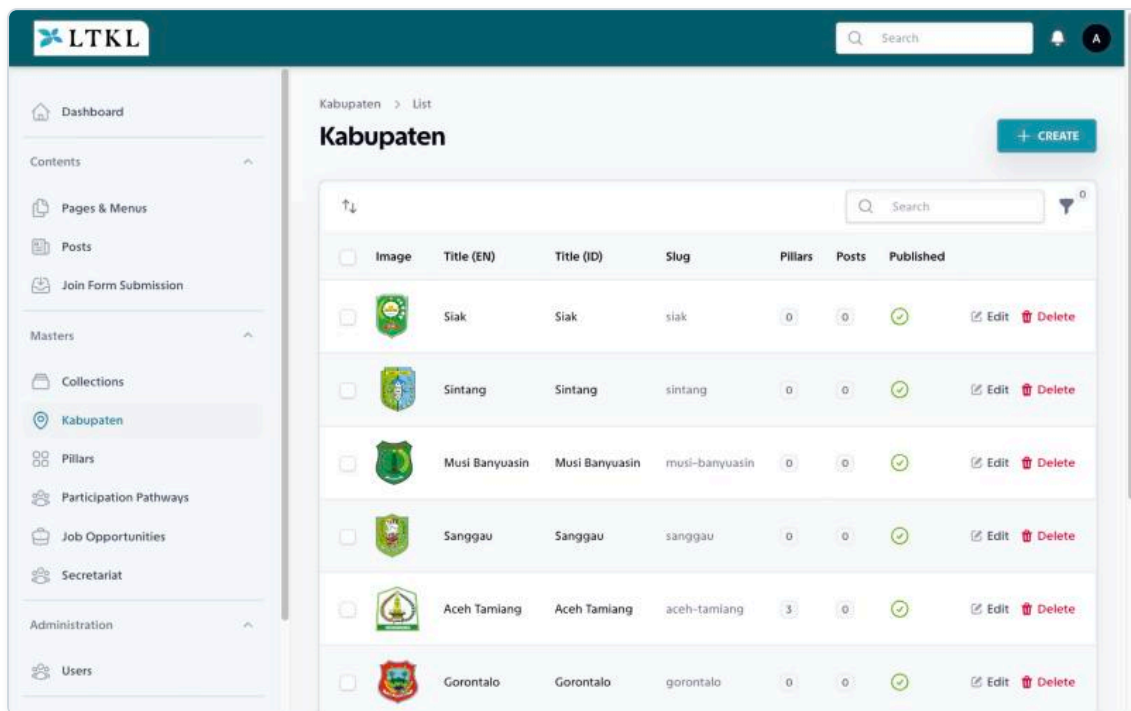

Figure 7.2 — The Kabupaten list.

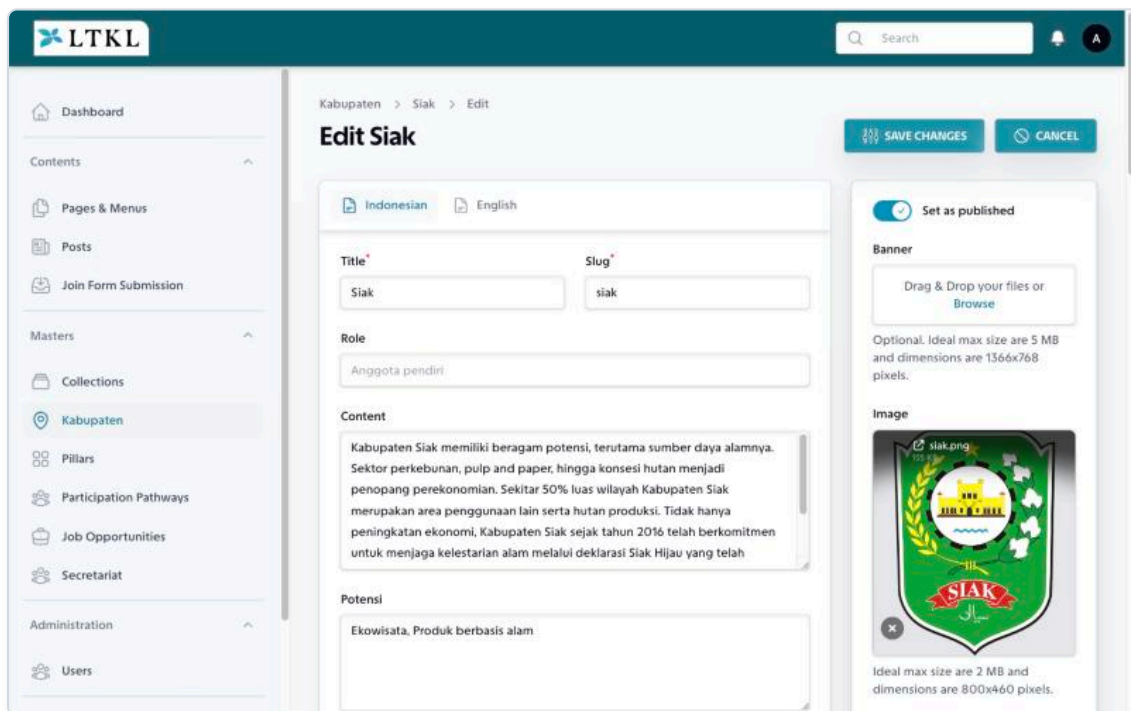

Figure 7.3 — Editing a kabupaten: language tabs on the left; publish switch, Banner and Image on the right.

General (shared by both languages)

Field	Description
Set as published	Show/hide the kabupaten on the website.

Banner / Image	Header banner (optional, max 5 MB, 1366×768 px) and card image/logo (max 2 MB, 800×460 px).
Dashboard URL	Link to the kabupaten's data dashboard.
Join year	Shown as “Anggota sejak {year}”.
Pillars	Shown as “Pilar Terkait” on the kabupaten page.

Language tabs

Title, Slug, Role, Content and Potensi for each language.

Map Location

“Click the map to drop the pin, or type the coordinates directly.” Use **Search location** (powered by OpenStreetMap) to find a place quickly — picking a result moves the pin; adjust it on the map afterwards if needed. **Latitude** and **Longitude** are filled automatically (latitude must be between -11.5 and 6.5 , longitude between 94.5 and 141.5 — i.e. within Indonesia).

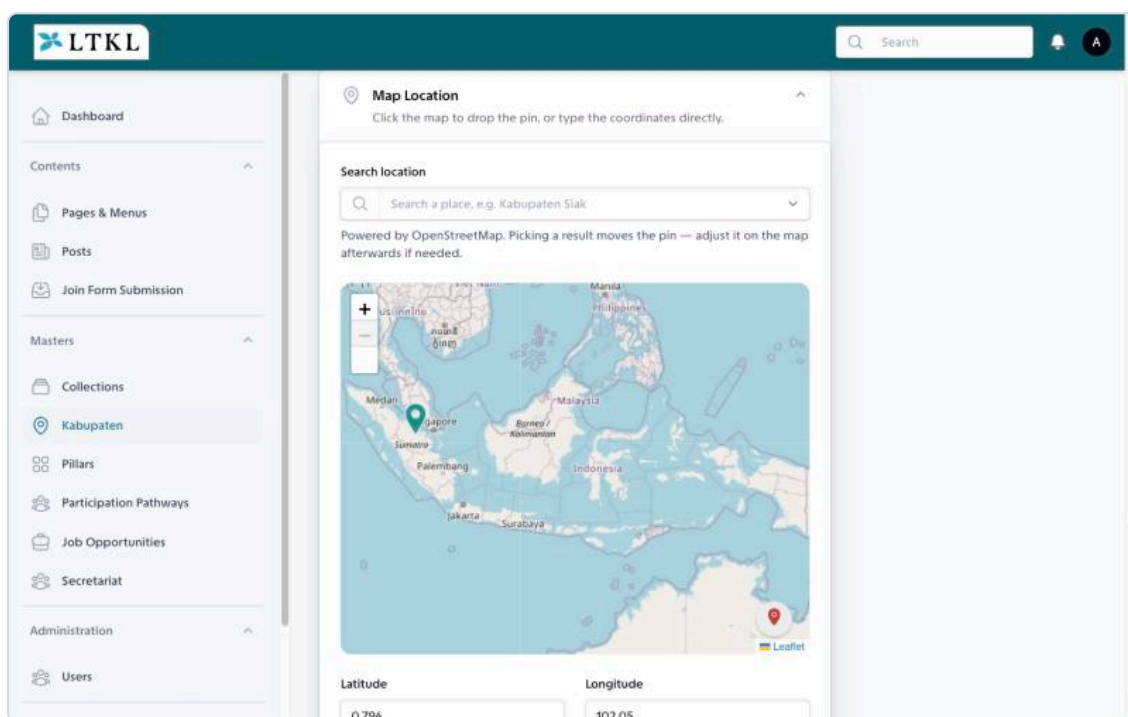

Figure 7.4 — Map Location: search a place or click the map to move the pin.

Landscape

Baseline figures: City, Province, Area (km²), Forest Cover (ha), Protected Area (ha), Social Forestry & TORA (ha — Perhutanan Sosial and Tanah Objek Reforma Agraria, as one figure).

Commodities (per language)

Potential commodity cards: Name, Icon, Description. Drag to reorder — the card numbering follows this order.

Cerita Gerakan (optional)

Intro of the story block (Label, Title, Description, Image) and **Stories**: pick the posts to show here. Drag to reorder — the website keeps this order.

Impacts (per language)

Local impact items. Choose a **Type** for each row:

Type	Fields
Data	Value, Source, Title, Description — a measurable number.
Quote	Quote, Name, Image.
Text	Title, Description.
Image Text	Image with title and text.

7.3 Pillars

Masters → **Pillars**. The “Pilar 01, 02...” number is the position in the list — drag rows on the list page to change it (or set **Order**: lower numbers come first).

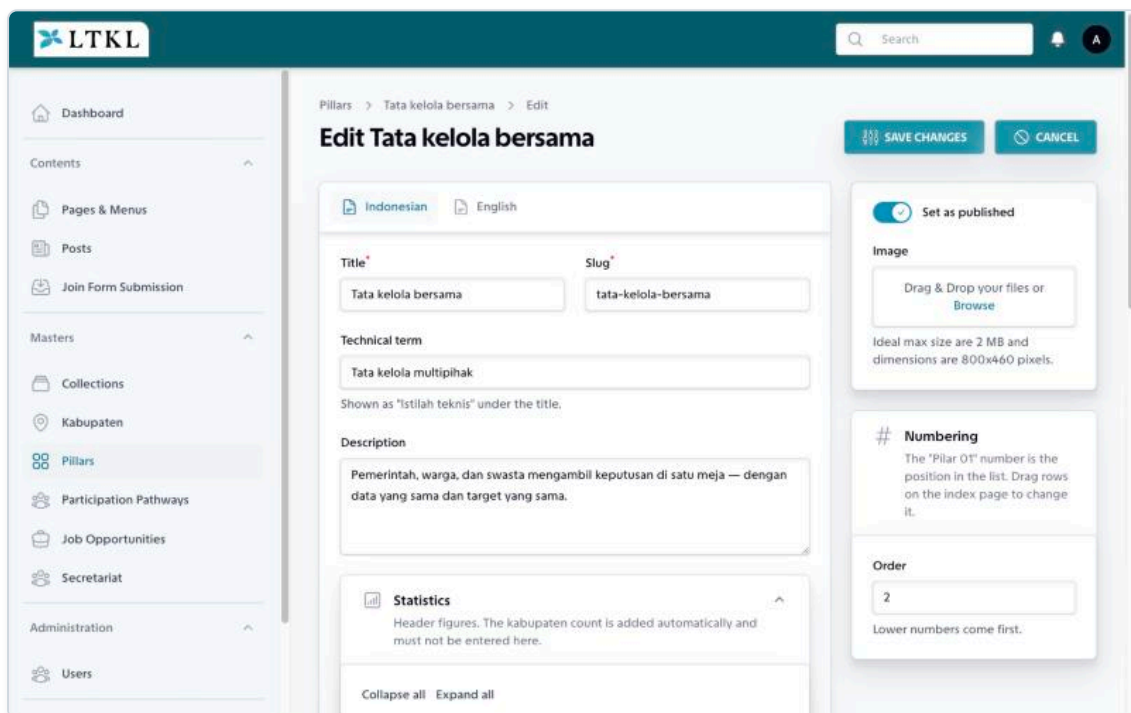

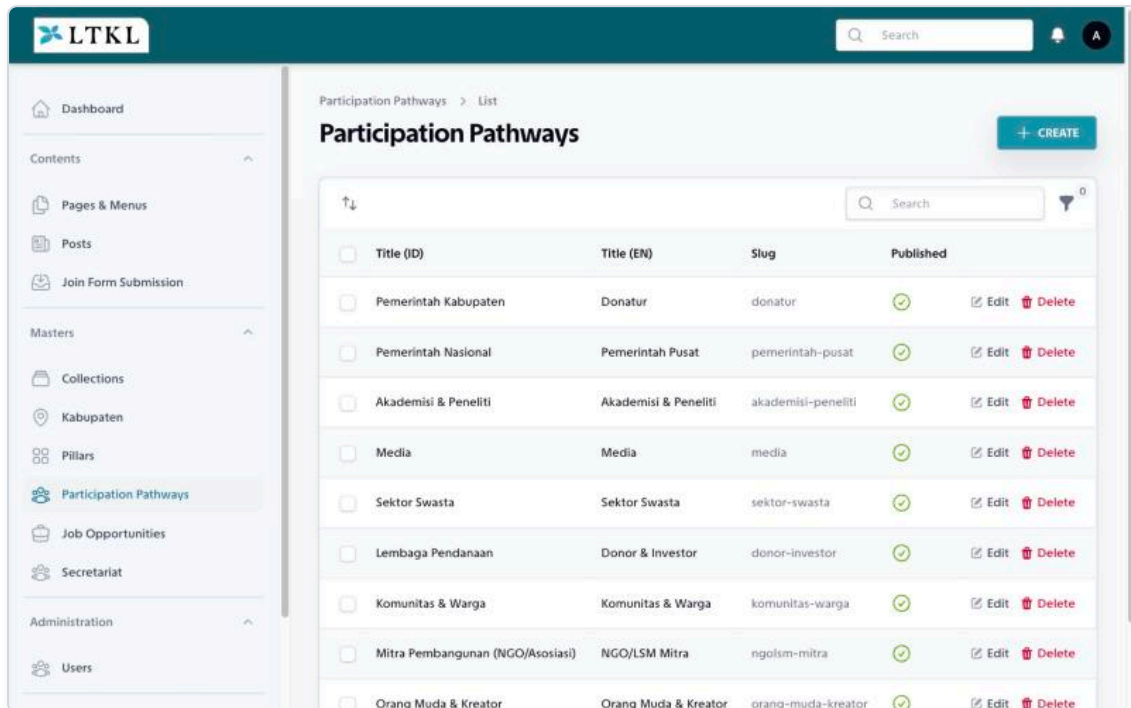

Figure 7.5 — Editing a pillar, with the Numbering panel on the right.

Section	Fields
General	Set as published, Image (max 2 MB, 800×460 px).
Language tabs	Title, Slug, Technical term (shown as “Istilah teknis” under the title), Description.
Statistics	Header figures: Value, Label. <i>The kabupaten count is added automatically and must not be entered here.</i>
Hasil Pilar Ini	Measured results: Value, Title, Description, Source. Each row needs a source.
Bagaimana Ini Terlihat di Lapangan	Field practices, each anchored to a kabupaten: Kabupaten, Since year, Title (ID/EN), Description (ID/EN), Image. Both languages live on the same row.

7.4 Participation Pathways

Masters → Participation Pathways. The ways people can get involved with LTKL. Fields: Set as published; per language: Title, Slug, Description. Published pathways appear in the Collection block (Participation Pathways source) and as **Role** options on the join form.

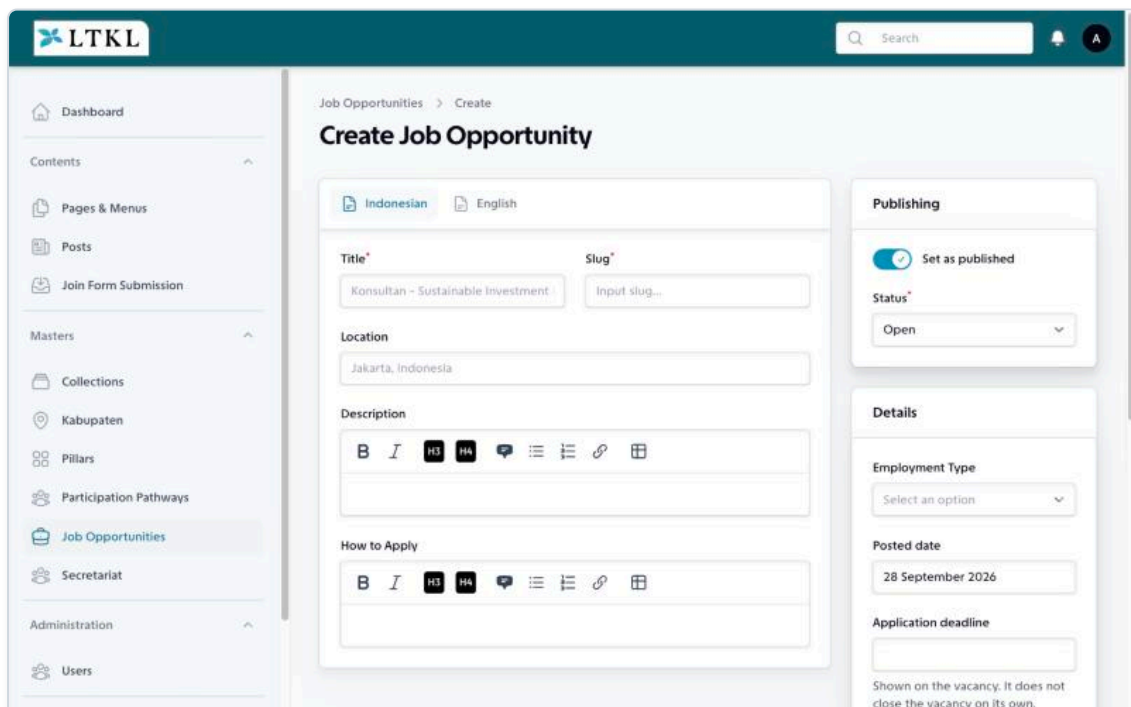

☐	Title (ID)	Title (EN)	Slug	Published	
☐	Pemerintah Kabupaten	Donatur	donatur		Edit Delete
☐	Pemerintah Nasional	Pemerintah Pusat	pemerintah-pusat		Edit Delete
☐	Akademisi & Peneliti	Akademisi & Peneliti	akademisi-peneliti		Edit Delete
☐	Media	Media	media		Edit Delete
☐	Sektor Swasta	Sektor Swasta	sektor-swasta		Edit Delete
☐	Lembaga Pendanaan	Donor & Investor	donor-investor		Edit Delete
☐	Komunitas & Warga	Komunitas & Warga	komunitas-warga		Edit Delete
☐	Mitra Pembangunan (NGO/Asosiasi)	NGO/LSM Mitra	ngolsm-mitra		Edit Delete
☐	Orang Muda & Kreator	Orang Muda & Kreator	orang-muda-kreator		Edit Delete

Figure 7.6 — Participation Pathways list.

7.5 Job Opportunities

Masters → Job Opportunities.

Create Job Opportunity

Indonesian English

Title* Konsultan - Sustainable Investment Slug* Input slug...

Location Jakarta, Indonesia

Description B I H3 H4

How to Apply B I H3 H4

Publishing

☒ Set as published

Status* Open

Details

Employment Type Select an option

Posted date 28 September 2026

Application deadline

Shown on the vacancy. It does not close the vacancy on its own.

Figure 7.7 — Creating a job opportunity. Status defaults to Open and Posted date to today.

Section	Fields
Language tabs	Title, Slug, Location, Description, How to Apply.
Publishing	Set as published; Status : Open or Closed.
Details	Employment Type (Full Time, Part Time, Contract, Consultant, Internship, Volunteer), Posted date, Application deadline.
Applying	Contact email, Apply URL, Job description file (terms of reference, max 50 MB).

Deadlines do not close vacancies

The application deadline is only displayed. A vacancy stays **Open** until you change its Status to **Closed** — remember to close it when recruitment ends.

7.6 Secretariat

Masters → **Secretariat**. Members of the LTKL secretariat for the organisation chart. Drag rows to set their order within a level.

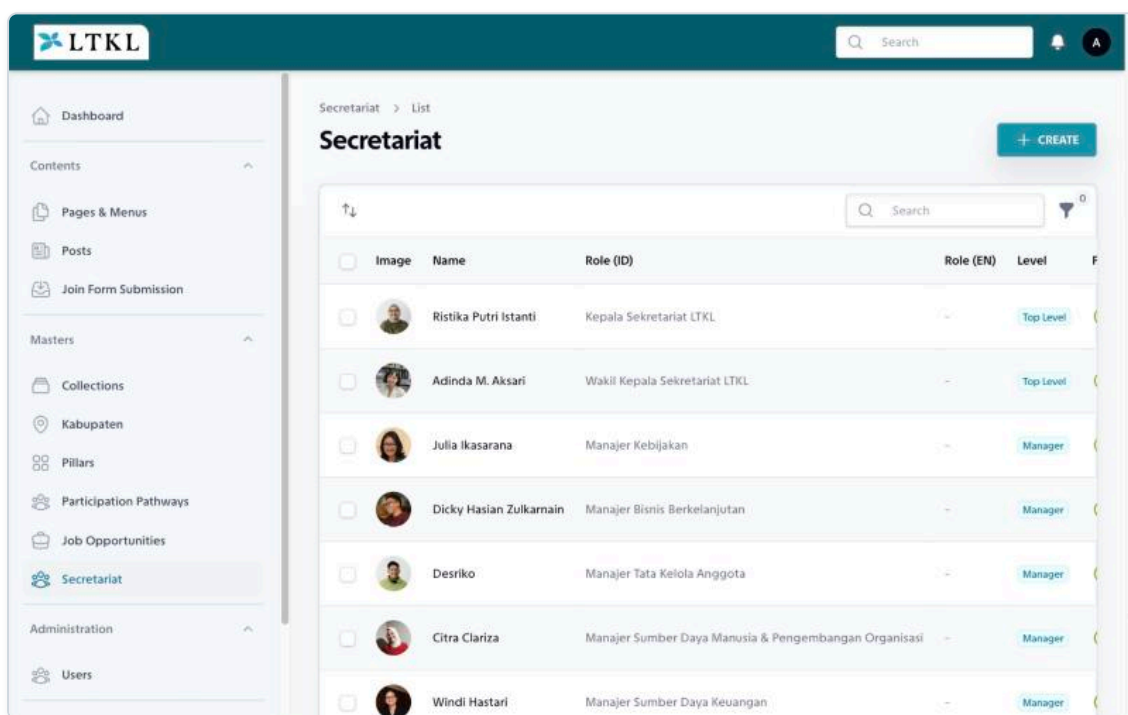

Figure 7.8 — The Secretariat list with each member's level.

Field	Description
Set as published	Show/hide the member.
Image, Name	Photo and full name.
Level	Top Level , Manager or Staff — decides the row in the organisation chart.
Role (per language)	Job title in Indonesian and English.

8 Website Settings

Settings → **Website**. Global settings for the whole site, organised in tabs. Click **Save** (top-right) after changes.

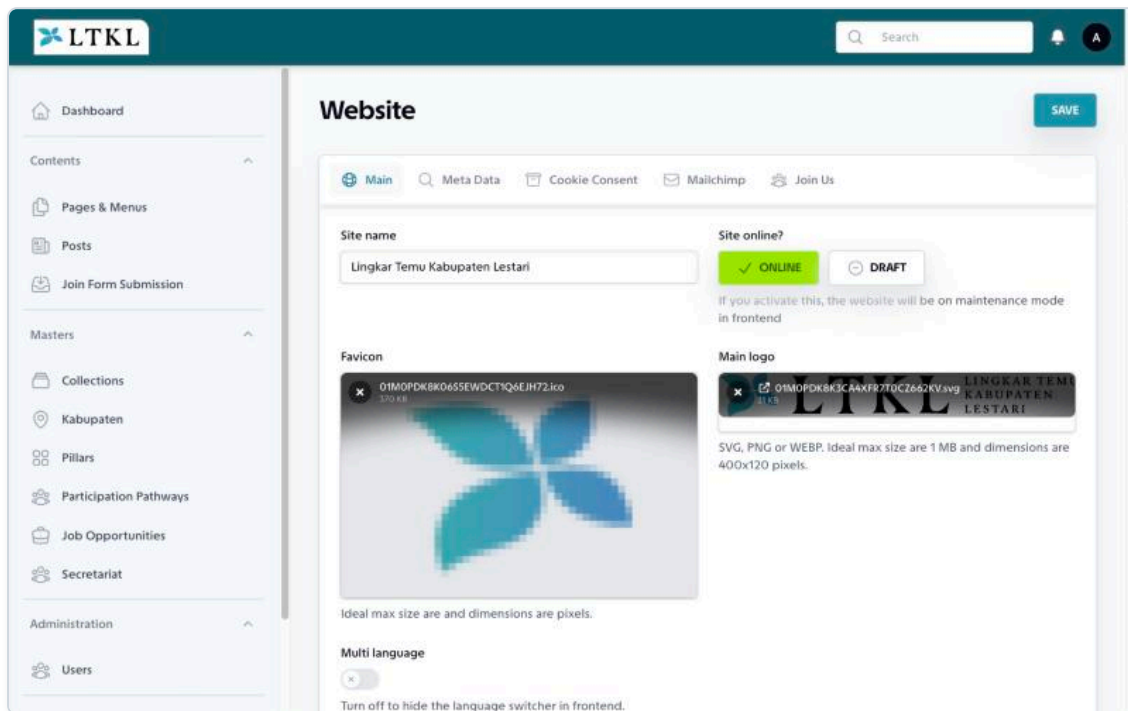

Figure 8.1 — Website settings, Main tab.

Tab	Settings
Main	Site name ; Site online? — Online or Draft ; Draft puts the public website in maintenance mode; Favicon ; Main logo (SVG, PNG or WEBP, 1 MB, 400×120 px); Multi language — turn off to hide the language switcher. Footer : Footer logo (same format as the main logo), Footer description (ID/EN). Footer CTA : closing call-to-action above the footer — Title, Description and Button text in both languages, plus one Button URL shared by both. Social media : list of Site (Facebook, X, Instagram, Linkedin, Youtube) + URL.
Meta Data	Global meta description (ID/EN) — ideally under 160 characters; Global meta image — used when a page has no own meta image.
Cookie Consent	Cookie title and content for the cookie banner (ideally about 180 characters, 200 max).
Mailchimp	API key for the newsletter signup. Handle with care; only change if instructed by the developer.
Join Us	Recipient email — submissions from the join form are sent to this address.

Careful with “Site online?”

Setting it to Draft affects the entire public website immediately. Use it only for planned maintenance, and switch it back when done.

9 Users & Your Profile

Managing users

Administration → **Users**. Add a person who needs access to the CMS.

- 1 Click **Create**.
- 2 Enter **Name** and **Email** (must be unique).
- 3 Set a **Password** and repeat it in **Password confirmation**.
- 4 Click **Create** and share the credentials with the person securely (not in plain email).

When editing a user, leave the password fields empty to keep the current password. Fill them in only to set a new one.

Permissions

Access rights are role-based. If a user cannot see a menu they need, contact the technical administrator to adjust their role.

Your profile

Open the avatar menu (top-right) → **Profile** to change your name, email or password. Sign out from the same menu when you finish, especially on shared computers.

10 Recipes

Step-by-step instructions for the most common jobs.

Publish a news article

- 1 Go to **Posts** → **Create**. Keep Type = **Article**.
- 2 In the **Indonesian** tab, enter Title and Lead, then add content blocks (Paragraph, Single Image, Quote...).
- 3 Switch to the **English** tab and repeat with the translation.
- 4 In the side panel, upload the Image, choose Categories/Tags and related Kabupaten, and set **Published at**.
- 5 Leave **Set as published** on (or off to save as draft) and click **Create**.

Announce an event

- 1 Create a post and choose Type = **Event**. The *Event Details* section appears.
- 2 Set Start date (and End date if multi-day), times and Timezone.
- 3 Add the Registration URL to show the “Daftar sekarang” button; toggle the badges as needed.
- 4 In each language tab, fill Location and Cost.
- 5 After the event, turn **Registration open** off.

Add a page to the menu

- 1 Go to **Pages & Menus** → **Create**. Fill Title in both tabs.
- 2 Add components (e.g. Banner, Paragraph, Text Image).
- 3 In **Menu Settings**: keep *Set as active* on, pick the *Menu group* (Main/Header/Footer) and, for a sub-item, the *Menu parent*.
- 4 Save, then drag the page into position in the page list.

Add a menu link to another website

- 1 Create a page with the menu label as its Title.
- 2 Turn on **Set as external link** and fill **Menu url**.
- 3 Choose the Menu group and save.

Post and close a vacancy

- 1 Masters → **Job Opportunities** → **Create**. Fill both language tabs.
- 2 Set Status = **Open**, Employment Type, Posted date and Application deadline; add the contact email/Apply URL and ToR file.
- 3 When recruitment ends, edit the vacancy and set Status = **Closed**.

Add a new member kabupaten

- 1 Masters → **Kabupaten** → **Create**. Upload Banner and Image, set Join year and Pillars.
- 2 Fill Title, Role, Content and Potensi in both tabs.
- 3 Search the location and fine-tune the map pin.
- 4 Enter Landscape figures, Commodities and Impacts; optionally pick Stories for Cerita Gerakan.
- 5 Publish and drag it into place in the Kabupaten list. It now appears automatically in Kabupaten Map/List blocks.

11 Troubleshooting & FAQ

Problem	What to do
"The slug has already been taken."	Another record (possibly in the trash) uses the same slug. Change the slug slightly (e.g. add the year), or restore/force-delete the old record.
I can't save, but see no error.	A required field is empty in the other language tab or inside a collapsed block. Open both tabs and expand blocks to find the red message.
My page is not in the menu.	Check <i>Set as published</i> , <i>Set as active</i> and that a <i>Menu group</i> is selected.
My post does not appear on the website.	Check <i>Set as published</i> and that <i>Published at</i> is not in the future.
An image looks blurry or loads slowly.	Upload at the recommended dimensions shown under the field; compress large photos before uploading.
Upload fails.	The file is too large (images ≈5 MB, documents 50 MB) or of an unsupported type. Compress or convert and try again.
I deleted something by mistake.	Open the list, use the Trashed records filter → "Only trashed", and click Restore .
The vacancy still shows as open after the deadline.	By design. Set its Status to Closed .
Pillar numbers are in the wrong order.	Re-order the rows in the Pillars list (or adjust the Order field).
A section link in the menu jumps to the wrong place.	Edit the block's <i>Submenu title</i> — the anchor is derived from this text.
Join form emails are not arriving.	Check the Recipient email in Website → Join Us; submissions are always kept in Join Form Submissions.

Good practice checklist

- Fill in **both languages** before publishing.
- Write meta descriptions of about 160 characters for important pages.
- Use descriptive file names and correctly sized images.
- Save drafts with *Set as published* off and ask a colleague to review before going live.
- Close vacancies and registrations when they end.
- Sign out on shared computers.

Need help?

For access problems, errors or new features, contact the website's technical administrator. Please include the page address, what you were doing, and a screenshot of any error message.
